DETAILED ACTION

REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

There was no prior art found by the examiner that suggested modification or combination with the cited art so as to satisfy the combination of all the limitations in claims 2, 4, 12, 26, and 42.

As to claim 2, the prior art of record, taken alone or in combination, fails to disclose or render limitations **“a plurality of microwells in said substrate, said microwells configured to confine a biological sample; and a processing circuit communicatively coupled to the light detection circuit to receive the signal and including an instruction-responsive processor on the substrate and adapted to process the signal and to provide an assay output corresponding to the detected optical characteristics, and including a data storage circuit on the substrate, coupled to the processor and configured to store data, the processor being configured to retrieve data from the data storage circuit for processing the signal and providing the output”**, in combination with the rest of the limitations of claim 2.

As to claim 4, the prior art of record, taken alone or in combination, fails to disclose or render limitations **“a plurality of microwells in said substrate, said microwells configured to confine a biological sample; a processing circuit communicatively coupled to the light detection circuit to receive the signal and including an instruction-responsive processor on the substrate and adapted to process the signal and to provide an assay output corresponding to the detected**

optical characteristics; and a temperature controller configured and arranged to control the temperature of the light detection circuit", in combination with the rest of the limitations of claim 4.

As to claims 12, the prior art of record, taken alone or in combination, fails to disclose or render limitations **"a plurality of microwells in the chip, said microwells configured to confine a biological sample, wherein the light detection circuit includes a photosensitive area that is matched to the microwell size"**, in combination with the rest of the limitations of claim 12.

As to claim 26, the prior art of record, taken alone or in combination, fails to disclose or render limitations **"a decoder circuit adapted to receive the data read out from the pixels and to generate a signal in response to the data, the generated signal including data linking the location of the pixels in the array to the light detected at each pixel; an analog-to-digital converter adapted to convert analog data from the decoder circuit into digital data, the memory circuit being adapted to store the converted data; and a processor on the substrate, communicatively coupled to the memory circuit and adapted to receive and process the stored digital data and to provide an output corresponding to the detected optical characteristic"**, in combination with the rest of the limitations of claim 26.

As to claim 42, the prior art of record, taken alone or in combination, fails to disclose or render limitations **"receive and process the signal and, in response, provide an assay output corresponding to the detected optical characteristic; and**

a plurality of microwells in said substrate, said microwells configured to confine a biological sample", in combination with the rest of the limitations of claim 42.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
